Check Point Security Administration NGX I Rev 1.1

Check Point Security Administration NGX I is a foundation course for Check Point's flagship product, VPN-1/FireWall-1. This course covers configuring VPN-1/FireWall-1 and provides hands-on training managing a VPN-1/Fi.

Check Point Security Administration NGX II Rev 1.1

Check Point Security Administration NGX II offers advanced training on VPN-1/Fire Wall-1 and delivers in-depth information on VPN and encryption technologies. This course is designed for security administrators and resellers who require in-depth knowledge of VPN-1/FireWall-1 that goes beyond basic installation, setup, and methodologies.

Check Point Security Administration NGX III

Check Point Security Administration NGX III offers comprehensive training to enhance enterprise knowledge of VPN-1 NGX, network planning, route-based VPN, and troubleshooting procedures.
