ESI TECHNOLOGIES NAMED TREND MICRO SECUREONE PARTNER

Montréal – May 30, 2007 –ESI Technologies, the leading independent solutions integrator in Quebec in IT security and high availability has announce their acceptance into Trend Micro’s new “SecureONE Partner Program.” Trend Micro is the leading provider of antivirus and internet security products that cover every virus entry point - internet gateways, groupware and intranet servers, LAN servers, and desktops for homes and businesses worldwide.

“With security being at the height of concern for our customers, ESI has created security architectures that encompass industry best practices,” said Patrick Naoum, vice president, Client solutions for ESI. “Trend Micro plays a significant role in our designs.”

“As a **Cisco Silver Partner** with a focus on voice, networking, wireless and security, ESI is a key partner for Trend Micro in helping customers leverage their existing investments in Cisco networks to create a “Self-Defending Network,” says Marc Nyitrai, Eastern Canadian channel development manager at Trend Micro. “ESI’s focus on technical excellence is the key to ensuring our customers can get maximum benefit out of the integration of Trend Micro security solutions into Cisco networks.”

About Trend Micro Incorporated

Trend Micro is a global leading provider of comprehensive antivirus, Internet content security, and outbreak management software and services. Our products and services are designed to deliver coordinated protection at application and network layers to proactively manage the outbreak lifecycle—from vulnerability prevention to malicious code prevention and elimination. Trend Micro's product and services categories are designed to address all major areas of the enterprise including Desktop & Client, Outbreak Management, Network Protection, Email & Groupware, Internet Gateway, File Server & Storage, and Mobile Security. For additional information and evaluation copies of Trend Micro products and services, visit our web site at www.trendmicro.com.

About ESI Technologies

ESI Technologies is a Canadian leader in architecture, design, deployment and support of customized, effective IT solutions, either on site or remotely, that ensure the availability, security, management and performance of critical data, applications and networks. ESI also deploys an on-demand IT service management solution (Octopus), based on ITIL standards, and offers integrated business management solutions such as Action, Microsoft Business Solutions and Oracle. ESI Technologies is headquartered in Montreal, with offices in Toronto and Quebec City. For more information on ESI Technologies, please visit www.esitechnologies.com
