

## Leverage the cloud by defining your strategy with experts!

Evaluating cloud solutions that will enable the organisation to grow and profit from the new opportunities created by cloud computing can sometimes be a challenge.

The ESI *Cloud Readiness Assessment* delivers a **review of your strategic cloud vision** focusing on four areas to consider to help you navigate through cloud adoption: strategy, finance, risk and governance.

ESI's approach involves the collaboration of experts working in parallel on business needs and processes, applications and infrastructure affected.

**Cloud should be considered a business strategy first**, and a technology second. ESI experts will help you define a strategy coupled with an action plan with clear and measurable goals.

### What the ESI assessment provides

- An **evaluation of your current situation**, strategies applicable to your environment, various scenarios and an implementation strategy
- A **qualitative and quantitative study with a budget forecast** of the action plan and expected results
- A **review of your objectives** to ensure that existing processes and compliance requirements of your organization are well understood
- A review of **available cloud options** best suited to your needs
- A **transition plan** considering namely business needs, corporate governance and applications requirements, data protection and recovery and required SLAs

**DEFINE** your goals,  
**PLAN** your strategy and  
**EVALUATE** your options  
for a successful  
transition!

**TALK** to ESI experts and  
**GET** an action plan for  
implementing your cloud  
strategy!
