

React timely to problems on your assets

IT management and maintenance are often faced with reduced budgets, chronic staff shortage and increased responsibilities.

Consequently, despite the implemented solutions, it can sometimes be difficult to **ensure the sustainability of your business environment.**

With its *Continuous Equipment Monitoring Service*, ESI keeps an eye on your IT environment and automatically **detects performance, capacity or availability issues** with your infrastructure and **processes everything that appears problematic** in your environment.

Information is analyzed in real-time and your team is made aware of any failure or performance problem detected.

Benefits of the ESI service

- 🌱 **Monitoring of systems performance** - memory occupancy rate, available space on devices, load on processors, asset discovery...
- 🌱 **Proactive and quick reaction** in case of problems on your IT assets
- 🌱 **Optimization of the time** of your IT teams
- 🌱 **Reduce the impact** and **frequency of incidents** on your infrastructure
- 🌱 **Additional support** to existing resources

AVOID downtime,
PREVENT problems and
ENSURE environment
sustainability.

ENTRUST ESI experts the
management and operation of
your IT assets and **FOCUS** on
developing your business!
